Preface

This book contains most of the papers presented at the 12th International Conference on Urban Transport and the Environment, held in Prague in 2006. The meeting was organised by the Wessex Institute of Technology in the UK and the Technical University Pardubice in the Czech Republic.

The conference series has always attracted a wide international spread of delegates and is now well established as the premier annual event of its kind. It first started in Southampton (1995); continuing in Barcelona (1996); Acquasaparta, Italy (1997); Lisbon (1998); Rhodes (1999); Cambridge, UK (2000); Lemnos, Greece (2001); Seville (2002); Crete (2003); Dresden (2004); and Algarve (2005).

Transportation in cities, with its related environmental and social concerns continues to be a topic of the utmost priority for urban authorities and central governments around the world. Frequently, the concern is not orderly but driven by the crises and increased demands which take place regularly and even the best planned urban transport systems require considerable studies to safeguard their safety, maintenance and operational use.

The continuing need for better urban transport systems in general and the demand for a healthier environment has led to an increased level of research around the world. This is reflected in the contents of this book, which stresses the continuous steady growth and research into the urban transport systems control aspects, information and simulation systems. All these topics continue to be of importance for analysing the complex inter-relation of the urban transport environment and for establishing action strategies for transport and traffic problems.

The papers included in the volume cover a wide variety of topics, such as: Transport sustainability; Urban transport planning and management; Transport modelling and simulation; Transport logistics and operations research; Transport security and safety; Transport technology; Land use and transport integration; Environmental and ecological considerations; Intelligent transport systems; Public transport systems; Information systems and GPS applications; Road pricing.

All the papers in this book have been permanently archived on the Publisher's website (www.witpress.com) as an added service to the international community.

The Editors are grateful to the authors for their contributions and to the members of the International Scientific Advisory Committee for their help.

The 13th Conference in this Series will be held from 3 to 5 September 2007, in Coimbra, Portugal, organised by the Wessex Institute of Technology and the University of Coimbra.

The Editors
Prague, 2006

Contents

Section 1: Transport sustainability

Future news of international freight transport markets – what to expect and how to be prepared <i>G. Mattrisch & E. Böhlke</i>	3
Sustainable transport systems: trends and policies <i>M. Pitsiava-Latinopoulou, S. Basbas & P. Christopoulou</i>	13
The transport challenge in the sustainability of megacities <i>A. Igwe</i>	23
Sustainable transport system using renewable energy and efficient electric vehicles <i>J. Redgate, A. Al-Habaibeh, A. Williams & M. Kansara</i>	33
The possibilities of company mobility management in Finland <i>E. Sala & N. Karasmaa</i>	43
Personal repertoire of travel modes and mode change potential <i>N. Karasmaa & V. Voltti</i>	53
Towards sustainable urban development: traffic generation at food superstores in the UK <i>C. Black, D. C. Broadstock, A. Collins & L. C. Hunt</i>	61

Section 2: Urban transport planning and management

Evaluation of bus transfer stations from the passenger's point of view <i>S. Basbas</i>	73
Design of modern roundabouts in urban traffic systems <i>A. Pratelli</i>	83

Bus priorities and their effects on local trade <i>S. Ward</i>	95
Evaluation of urban transport management <i>J. Murphy & D. O’Cinneide</i>	103
Selection of modal choice nodes in urban intermodal networks <i>D. Ambrosino & A. Sciomachen</i>	113
Sustainable development and strategic transport management in the Øresund region <i>S. L. Jeppesen & S. Leleur</i>	123
Active travel and urban transport: what works and what doesn’t – an antipodean perspective <i>R. Katz</i>	131
Accessibility based automobile transport system analysis in Lithuanian regions and forecasting potential in residential areas <i>M. Jakimavicius & A. Macerinskiene</i>	141
Rational policy goals: road safety in Scandinavia <i>H. Rosencrantz</i>	151
Twin Cities truck traffic management strategies <i>T. H. Maze & R. Gale</i>	159
Measuring indirect economic impacts arising from transportation investment by a SCGE model <i>T. Miyagi, M. Nishimura & S. Mitui</i>	169
High occupancy vehicle lanes – worldwide lessons for European practitioners <i>S. Schijns & P. Eng</i>	181
A collaborative transportation proposal for urban deliveries: costs and environmental savings <i>D. Tacla, O. F. Lima Jr & R. C. Botter</i>	195
Modelling trip timing behaviour and the influence of peak spreading <i>N. Holyoak & M. A. P. Taylor</i>	205
Planning the walking and cycling network in Põlva, Estonia <i>M. Myllylä & N. Karasmaa</i>	215

Urban transport system benchmarking <i>M. W. Ludema</i>	223
--	-----

Mobility Management: the case of a large university campus in Rio de Janeiro, Brazil <i>D. S. C. P. Lemos, R. Balassiano, M. P. S. Santos & L. S. Portugal</i>	233
--	-----

Section 3: Transport modelling and simulation

Vehicle routing: less “artificial”, more “intelligence” <i>J. W. Joubert</i>	245
---	-----

Pervasive model, a new paradigm of computing applied to road transport systems <i>C. García, F. Alayón, J. Caraballo, R. Pérez & G. Padrón</i>	257
--	-----

Cellular automata simulation of traffic flow through a road with a construction zone <i>E. Kita, T. Tamaki & H. Shimizu</i>	267
---	-----

The accuracy of traffic microsimulation modelling <i>D. O’Cinneide & D. Connell</i>	277
--	-----

Evaluation and further development of car following models in microscopic traffic simulation <i>P. Hidas</i>	287
--	-----

AREViRoad: a virtual reality tool for traffic simulation <i>D. Herviou & E. Maisel</i>	297
---	-----

A dynamic and automatic traffic light control system for solving the road congestion problem <i>W. Wen & C. L. Yang</i>	307
---	-----

Analysis of user behaviour at a roundabouts under car-following conditions <i>G. Guido & A. Vitale</i>	317
---	-----

Distributed parallel data structure of a traffic network simulation based on object-oriented programming <i>Z. Juan, L. Gao, A. Ni & G. Zhang</i>	327
---	-----

Modelling of freight transport flows in urban transport <i>A. Baublys</i>	337
--	-----

Section 4: Transport logistics and operations research

A solution for the optimisation of freight transport in urban areas <i>R. Raicu, S. Raicu & E. Rosca</i>	349
Reconstruction of the state road D8 – comparison of the variant solutions <i>D. Cvitanić, D. Breški & I. Lovrić</i>	359
Freight modal split models: data base, calibration problem and urban application <i>A. Cappelli & S. Nocera</i>	369

Section 5: Transport security and safety

Relative safety of alternative intersection designs <i>L. C. Wadhwa & M. Thomson</i>	379
Integrating highway alignment design capability to the Interactive Highway Safety Design Model (IHSDM): a two-lane highway case study <i>A. Maji, M. K. Jha & W. Kühn</i>	389
Tram wheel geometry monitoring system <i>J. Madejski & A. Gola</i>	399
Safety of deep slopes excavated during construction of underground structures <i>P. Procházka & V. Doležel</i>	409
Self-reported attributes of traffic accident involvement by female teachers working in Saudi Arabia <i>H. Al-Ahmadi, M. Al-Sughaiyer, N. Ratrou, K. Al-Ofi, H. Muttlak & A. Zeeshan Raza</i>	419
A driving simulator study on the perception of distances in situations of car-following and overtaking <i>J. Bergeron, B. Baumberger, M. Paquette, M. Flückiger & A. Delorme</i>	431
A review of traffic safety in Finnish municipalities <i>N. Karasmaa, E. Rätty, T. Kari & T. Ernvall</i>	439

Section 6: Transport technology

Automated transport in urban areas: opportunities in the Netherlands
J. H. Baggen & E. M. L. Aben.....453

Estimation of rutting characteristics of
waste tire rubber-modified asphalt binder using GPC
K. W. Kim, S. Lee & S. N. Amirkhanian.....463

Section 7: Land use and transport integration

Use of geospatial information and remote sensing data to support
improved roadway access management
R. R. Souleyrette, P. E. Plazak & D. J. Plazak477

Segregation and daily mobility, an international comparison
E. Ravalet491

Sustainable urban transport in Lithuania: influence of land use and
socio-economic development
Z. Bazaras, A. Kersys, R. Kersys & R. Skvireckas501

An increase of public transport and accessibility to urban amenities,
some limited results: the case of the Lyons conurbation
D. Caubel507

Bi-level modelling for linking transport activities with location choice
in the urban area
D. Parikesit517

Begin boulevard in Tel Aviv – from a suburban highway
to an urban boulevard
Y. Rofè & R. Ishaq.....531

Scenic road designation in Taiwan
S.-H. Lee, C.-C. Chiang & J.-S. Hou543

Effects of transportation on urban development: Sivrihisar, Turkey
E. Aksoy & N. T. Gültekin555

Getting places in New Zealand neighbourhoods
K. Witten.....567

Promoting economic diversification by the relationship between
the minerals sector and transport infrastructure in Saudi Arabia
M. Aldagheiri & M. Bradshaw.....579

Section 8: Environmental and ecological considerations

Multicriteria analysis in the selection of urban highway alignment alternatives with application of the analytic hierarchy process: an environmentally sustainable approach <i>M. V. Lisboa & J. Waisman</i>	595
The multi-purpose greenways network planning in the Taichung Metropolitan Area, Taiwan <i>S.-W. Huang & K.-W. Tsou</i>	605
Air quality in a tourist seashore city during vacation <i>N. Quaranta, M. Unsen, M. Caligaris, S. Ringler, S. Mendiara & M. García</i>	615
Seasonal contribution of air pollution of urban transport in the city of Chillán, Chile <i>O. F. Carvacho, J. E. Celis, K. Trzepla-Nabaglo, L. L. Ashbaugh & R. G. Flocchini</i>	623
Experimental research about gaseous emissions coming from multi-floor parks: a real case in Taormina (Italy) <i>F. Patania, A. Gagliano, F. Nocera, A. Galesi & A. D'Amico</i>	633
The impact of the rail welds geometry on the noise in urban zones <i>S. Lakusic</i>	643
The impact of energy prices on the sustainability of urban transport <i>P. Amrusch & F. Wirl</i>	653
Benzene, toluene and xylene measurements in the vicinity of petrol stations (Toulouse – France) <i>V. Simon, C. Borownjack & C. Touya</i>	663
The carbon dioxide emission reduction potential in China's road transport sector in 2020 <i>W. Cai, C. Wang, X. Lu & J. Chen</i>	669
Transalpine freight traffic's impact on people's quality of life <i>D. Hauri & N. Bauer</i>	679
Software of passenger vehicle optimal work and energy recovery (POWER) <i>H. Farzaneh & Y. Saboohi</i>	691

Section 9: Intelligent transport systems

Innovative policies for implementing intelligent speed adaptation on urban roads <i>V. Mehta, W. Walker, V. Marchau & B. Agusdinata</i>	703
The challenges of new information technologies applied to public transport and rail operations <i>P. Vuailat</i>	713
Role of microsimulation in evaluating intelligent transportation systems applications in urban transportation <i>A. M. Khan, J. Armstrong & A. Munir</i>	723
Evaluating emissions implications of proposed Intelligent Transportation Systems deployments: Canadian experience <i>I. Kaysi</i>	733
Mobile radio services for urban transport <i>C. Bantin</i>	743
A new architecture for advanced telematics services <i>A. Piccolo & V. Galdi</i>	749
Intelligent transportation-deployment and development process in Korea <i>A. A. Shah, N. P. Mahalik, J. Namkoong & J. D. Lee</i>	763

Section 10: Public transport systems

The analytic hierarchy process to evaluate the quality of service in transit systems <i>M. N. Postorino & V. Fedele</i>	775
Simulation of alternative implementation scenarios for the Metro system in Seville <i>J. Muñuzuri, J. N. Ibáñez, P. Cortés & J. Guadix</i>	785
Towards transportation system integration in the City of Tshwane Metropolitan Municipality <i>D. R. Diedericks & J. W. Joubert</i>	795
Achieving a pro-public transport agenda in South Africa – the challenge for middle income countries <i>A. Shaw</i>	805

The Marmaray Project in Istanbul: a shift from roads to railways <i>A. U. Oktem</i>	817
A new design methodology for public transport stations of a multimodal hub <i>F. Kaakai, S. Hayat & A. El Moudni</i>	827
Enhancing service quality in public transport systems <i>G. Beirão & J. Sarsfield Cabral</i>	837
Section 11: Information systems and GPS applications	
Capturing the spatiotemporal variability of fine particulates in travel microenvironments using GPS technology <i>S. P. Greaves</i>	849
An analysis of stand-alone GPS quality and simulated GNSS quality for road pricing <i>M. Zabic & O. A. Nielsen</i>	859
Section 12: Road pricing	
Bi-level optimal toll design problem solved by the inverse Stackelberg games approach <i>K. Staňková, G. J. Olsder & M. Bliemer</i>	871
Road pricing versus tradable entry rights: a transaction cost approach <i>E. Crals & L. Vereeck</i>	881
Tradable traffic rights for urban transport <i>E. Musso, C. Burlando & C. Sillig</i>	891
External transport pricing and modal choice: evidence from a Paris case study <i>A. de Palma & N. Zaouali</i>	901
Multi-toll-type motorway stations optimal layout <i>A. Pratelli & F. Schoen</i>	911
Urban congestion charging: road pricing as a traffic reduction measure <i>W. Heyns & C. B. Schoeman</i>	923
Author index	933
