

WIT Press Journals

International Journal of Sustainable Development and Planning

Objectives

In recent years, an increase in spatial and environmental problems in most countries has led to a crisis in environmental planning and management. The increasing urbanization of the world coupled with the issues of environmental pollution, resource shortage and economic restructuring demand a substantial effort in order to achieve sustainability.

The International Journal of Sustainable Development and Planning aims to inform its readers quickly on all aspects of environmental planning and management, spatial planning and sustainable development in an integrated way.

International Journal of Design & Nature and Ecodynamics

Objectives

The International Journal of Design & Nature and Ecodynamics acts as a channel of communication for researchers working on a variety of studies involving nature and its significance to modern scientific thought and design. These studies have demonstrated the rich diversity of the natural world. Ecodynamics in particular aims to relate ecosystems to evolutionary thermodynamics in order to arrive at satisfactory solutions for sustainable development. The journal also opens new avenues for understanding the relationship between arts and sciences.

This journal aims to provide a channel of communication between all those working in these exciting new disciplines whether they are in academia, research institutes or industry.

International Journal of Safety and Security Engineering

Objectives

The International Journal of Safety and Security Engineering provides a forum for publication of papers on the most recent developments in the theoretical and practical aspects of these important fields.

Safety and Security Engineering, due to its special nature, is an interdisciplinary area of research and applications that brings together in a systematic way many areas of engineering, from the traditional to the most technologically advanced. The Journal covers areas such as crisis management; security engineering; natural disasters and emergencies; terrorism; IT security; man-made hazards; risk management; control; protection and mitigation issues amongst others.

International Journal of Computational Methods and Experimental Measurements

NEW
FOR 2013

Objectives

The International Journal of Computational Methods and Experimental Measurements provides the scientific community with a forum to present the interaction between the complementary aspects of computational methods and experimental measurements, and to stress the importance of their harmonious development and integration.

The steady progress in the efficiency of computers and software has resulted in the continuous development of computer simulation, which has influenced all scientific and engineering activities. As these simulations expand and improve, the need to validate them grows, and this can only be successfully achieved by performing dedicated experimental tests. Furthermore, because of their continual development, experimental techniques are becoming so complex and sophisticated that they need to be controlled by computers, with the data obtained processed by means of computational methods.

THE KNOWLEDGE CENTRE OF THE WESSEX INSTITUTE OF TECHNOLOGY

THE ESSENTIAL GATEWAY TO THE LATEST SCIENTIFIC RESEARCH

WIT Press

www.witpress.com

Written by leading specialists, WIT Press books enable researchers, engineers and managers in industry and academia to remain up-to-date with the latest developments in their fields.

Visit our website to view our latest releases, special offers and reviews.

Submitting your paper

<http://journals.witpress.com>

WIT Press Journal papers are subjected to peer review. In order to be acceptable for publication submissions must make a new contribution to the scientific community.

Authors interested in submitting a paper are requested to visit our journals website at the following link:

<http://journals.witpress.com/submit.asp>

or

Contact the editors using the details below:

WIT Press Journals

WIT Press eLibrary

**Including the Transactions of the
Wessex Institute of Technology**

<http://library.witpress.com>

The eLibrary contains up to 30,000 online papers from selected WIT Press titles and the Transactions of the Wessex Institute of Technology. This collection is the most efficient way for researchers and academics to quickly and cost effectively access papers delivered at the Institute's prestigious conferences.

International Conference Programme

www.wessex.ac.uk/conferences

The excellent reputation of WIT Conferences held in different parts of the world serves as an ideal medium to achieve WIT's international knowledge transfer objectives. WIT is also committed to acting as a link between professional and academic bodies and encouraging trans- or inter-disciplinary research.
