The Sustainable World

Aims and Objectives

Sustainability is a key concept of 21st century planning in that it broadly determines the ability of the current generation to use resources and live a lifestyle without compromising the ability of future generations to do the same. Sustainability affects our environment, economics, security, resources, health, economics, transport and information decisions strategy. It also encompasses decision making, from the highest administrative office, to the basic community level. It is planned that this Book Series will cover many of these aspects across a range of topical fields for the greater appreciation and understanding of all those involved in researching or implementing sustainability projects in their field of work.

Topics

Data Analysis	Simulation Systems
Data Mining Methodologies	Forecasting
Risk Management	Infrastructure and Maintenance
Brownfield Development	Mobility and Accessibility
Landscaping and Visual Impact Studies	Strategy and Development Studies
Public Health Issues	Environment Pollution and Control
Environmental and Urban Monitoring	Land Use
Waste Management	Transport, Traffic and Integration
Energy Use and Conservation	City, Urban and Industrial Planning
Institutional, Legal and Economic Issues	The Community and Urban Living
Education	Public Safety and Security
Visual Impact	Global Trends
