Risk Analysis V
Simulation and Hazard Mitigation

Editors

Preface

This Volume of the Transactions of the Wessex Institute contains papers presented at the 5th International Conference on Risk Analysis that was held in Malta in 2006.

Risk analysis is a very important discipline, which provides tools enabling decision makers to make the right choice, whether it is related to prevention of hazards, mitigation of consequences of natural or man-made hazards or communication of risk. As the modern society evolves, it introduces new types of hazards and consequently new research is needed in order to quantify these risks and prepare adequate mitigation strategies.

The conference offered the opportunity for the professionals involved in risk analysis to inform themselves on the progress made by their colleagues in this field, to be involved in discussions on key issues and challenges in risk analysis and to exchange views on various aspects.

The papers in this volume are divided into a series of sections dealing with: Estimation of risk; Hazard prevention, management and control; Methods and systems of safe ship operation; Flood risk; Soil, water and air contamination; Security risk; Risk management and Network systems.

The Editors are grateful to all the authors for their excellent contributions and in particular to the members of the International Scientific Advisory Committee for the review of the abstracts and the papers thus ensuring the high quality of this book.

The Editors
Malta, 2006
Contents

Section 1: Estimation of risk

Risk analysis between possible and probable
M. El-Cheikh, A. H. C. Chan & J. Lamb.................................................................3

Natural hazard risk depending on the variability of damage potential
S. Fuchs & M. Keiler ..........................................................................................13

“On-zone” and “off-zone” geomorphic features for multirisk assessment related to slope dynamics in the Icelandic fjords
A. Decaulne & Th. Saemundsson ........................................................................23

Risk analysis in the chemical industry: an urea-formaldehyde resins case
A. Quintana, L. López-Doval, R. Rodríguez, J. A. Souto & J. J. Casares.............................33

A stochastic approach to rainfall forecasting in the space-time domain: the PRAISEST model
B. Sirangelo & D. L. De Luca.............................................................................43

Risk analysis and optimization of road tunnels
M. Holický...........................................................................................................57

Risk indexes for studying interconnected earthing systems inside MV networks
A. Campoccia & G. Zizzo....................................................................................67

Section 2: Hazard prevention, management and control

Geotechnical risk management as a basis for quality assurance
F. Rodriguez-Lopez, R. Jimenez-Rodriguez & P. Hruskovic.................................79

Redistribution of transport of hazardous materials and external safety risks: the case of rail transport in The Netherlands
A. V. van der Vlies..........................................................................................87

Risk assessment on railway transportation of hazardous materials
S. Cafiso, A. Di Graziano & N. Di Blasi.............................................................97

Sinkholes risk analysis: case history of Marsala (Sicily, Italy)
V. Liguori, G. Manno & V. Placenti .................................................................107
Introduction of an approach to disaster mitigation using crisis-adaptive information sharing platform and technology
T. Suzuki & Y. Goto ................................................................. 119

Section 3: Risk management

How to build a company risk profile: a methodology based upon the risks disclosed by Fortune 500 companies
C. Dumitriu ......................................................................... 129

A model for risk identification in ERP system processes
V. Leopoulos, K. Kirytopoulos & D. Voulgaridou .................. 143

Urban infrastructures and physical hazards: a challenge for planning
M. Tira, M. Tiboni, B. Badiani & C. Confortini .................... 153

Enhancing safety in the event of catastrophic failure: the case for continual use systems
S. A. McComb & A. V. Deshmukh ........................................ 163

Reliability evaluation of metal oxide varistors for maintenance scheduling
G. L. Amicucci & P. Gentile ................................................. 173

Section 4: Soil, water and air contamination

Application of the ISCST3 model to an industrial area: comparison between predicted and observed concentrations
M. Andretta, B. Leonzio, P. Lucialli & S. Righi ....................... 187

Probabilistic assessment of leachate propagation in the groundwater by an uncontrolled landfill
M. Pacheco & J. F. Vasconcellos ........................................... 197

Risk and impact assessment through air, water and soil quality modelling: an integrated approach
A. Ebel & T. Davitashvili ..................................................... 207

Section 5: Flood risk

Risk based decision making in Kaunas hydropower system during flood period
J. Simaityte Volskiene, J. Augutis & E. Uspuras .......................... 219
Living with dam-break flood risk: the case of a Portuguese dam-valley system
D. Sousa e Silva & A. Betâmio de Almeida .......................................................... 229

Storm surge induced by extratropical cyclone Gudrun:
hydrodynamic reconstruction of the event, assessment of mitigation
actions and analysis of future flood risks in Pärnu, Estonia
Ü. Suursaar & J. Sooäär .................................................................................. 241

A vulnerability analysis approach for the Portuguese West Coast
C. Coelho, R. Silva, F. Veloso-Gomes & F. Taveira Pinto ..................................... 251

Application of high-resolution (10 m) DEM on Flood Disaster
in 3D-GIS
M. Mori ............................................................................................................. 263

Cost-benefit analysis to select the optimal flood protection
strategy along the Scheldt
L. De Nocker, S. Broeks, I. Liekens, D. Bulckaen, S. Smets,
J. Gauderis & W. Dauwe ........................................................................... 271

Application of the NAM model to the Ali-Efenti basin
A. Ilias, J. Hatzispiroglou, E. Baltas & E. Anastasiadou-Partheniou ............. 279

Section 6: Methods and systems of safe ship operation
(Special session organised by J. Lisowski)

The dynamic game theory methods applied to ship control with
minimum risk of collision
J. Lisowski ....................................................................................................... 293

Application of 3D computer simulation for marine engineers as a
hazard prevention tool
R. Cwilewicz & L. Tomczak ........................................................................... 303

Diagnosis as a fundamental element for the safe exploitation of
marine power plants
A. Charchalis ................................................................................................. 313

Section 7: Security risk

Rationale and development of a Security Assurance Index with
application toward the development of a World Risk Index
M. M. Plum & G. A. Beitel ................................................................................ 325
Impact of coalition and insurgent force levels on civilian deaths and injuries in Iraq, 2003–2005
K. H. Tiedemann .................................................................341

Application of a systematic methodology to terrorism risk management
M. M. Bardazza, P. Vestrucci, G. Zappellini, P. Adinolfi,
M. Buldrini, S. La Rovere & C. Vercilli........................................351

Section 8: Network systems

Evaluation of hazard distribution in network structures
J. Augutis, R. Krikstolaitis, V. Matuzas & E. Uspuras .........................363

Evaluation of reliable path in risk areas
M. Di Gangi ...............................................................................371

Author index .............................................................................379
