Preface

Natural hazards such as floods, earthquakes, landslides, fires and others, have always affected human societies. Man-made hazards, however, played a comparatively small role until the industrial revolution when the risk of catastrophic events started to increase due to the rapid growth of new technologies. We live now in an increasingly complex society with the potential for regional and major worldwide scale disasters to occur frequently. The interaction of natural and anthropogenic risks – as in the well known case of climate change – adds to the complexity of the problem.

Scientific knowledge and research are essential to our better understanding of risk.

Advances in computational methods and the ability to model systems more precisely now enable hazards to be quantified, their effects to be simulated and risk analysis to be pursued with greater accuracy, providing for more effective risk management. These developments are not only important for all areas of human endeavour but have particular relevance to environmental issues where the risks involved are substantial. Effective risk management and the mitigation of possible hazards have become a high priority of government and a public concern.

This volume of the Transactions of Wessex Institute contains papers presented at RISK 2008, the 6th International Conference on Computer Simulation Risk Analysis and Hazard Mitigation, covering a series of important topics which are of current research interest and have practical applications. This volume contains contributions in many aspects of risk analysis and hazard mitigation, ranging from specific amounts of risk to mitigation associated with both natural and anthropogenic hazards.

The Editors would like to express their appreciation to the authors for the contributions published in this Volume, as well as to the members of the International Scientific Committee and others colleagues who helped select the papers contained in this volume.

The Editors
Cephalonia, Greece, 2008
Contents

Section 1: Estimation of risk

Hazards that threaten Greek wetlands: the case of Lake Koronia
V. Manakou, A. Kungolos & E. Beriatos ..............................................................3

Application of a flood risk model to the Thames Estuary for economic benefit assessment
B. P. Gouldby, P. B. Sayers & O. Tarrant ..........................................................11

A GIS tool for flood risk analysis in Flanders (Belgium)
W. Kellens, P. Deckers, H. Saleh, W. Vanneuville, Ph. De Maeyer,
G. Allaert & R. De Sutter....................................................................................21

Occurrence neighbourhoods and risk assessment from landslide hazard in northern Spain
A. G. Fabbri, J. Remondo, C. Ballabio, S. Poli, C. F. Chung
& H. J. Scholten ..................................................................................................29

The effect of the silting phenomenon on the characteristic volumes and the lake basins in the Someșul Cald reservoirs cascade system
Gh. Șerban ........................................................................................................43

Propagation of environmental risk from contaminant transport through groundwater and stream networks
K. Persson, J. Jarsjö, C. Prieto & G. Destouni ..................................................55

A quantitative microbial risk assessment of helminth ova in reusing sludge for agricultural production in developing countries
I. Navarro, B. Jiménez, E. Cifuentes & S. Lucario ............................................65

Assessment of the anthropogenic and natural risks in environmental and toxicological studies
G. Quartieri, P. Quercia, L. Quartieri & P. Avino............................................75
The local confidence uncertainty plume of SAKWeb©
J. Negreiros, M. Painho, A. Cristina Costa, P. Cabral & F. Aguilar..................81

Seismic risk assessment of the rural road network
S. Cafiso, A. L. Bruna & G. L. Cava.................................................................91

Risk analysis and safety in LPG storage: the Indexed Method
M. Mariani & M. R. Vallerotonda.....................................................................101

Assessment of fatality risk in collisions with cable median barriers
in the state of Washington

An integrated LCA/LCC framework for assessing product
sustainability risk
N. Palousis, L. Luong & K. Abhary.................................................................121

The prediction and mapping of coastal flood risk associated with
storm surge events and long-term sea level changes
T. Webster & D. Stiff......................................................................................129

European digital content sharing services for health protection and
occupational risk prevention
F. Rizzo, D. Ugolini, L. Maiorana, M. Gonzalez Rodriguez,
I. Laamanen, P. Boffetta, E. Mirkova, A. C. Wasilewska, G. Viano
& D. Vecchio....................................................................................................139

Section 2: Risk management
Remote sensing satellite imagery and risk management:
image based information extraction
G. Bitelli & L. Gusella......................................................................................149

Recent development of tsunami disaster reduction management in
Japan after the 2004 Indian Ocean Tsunami
Y. Kawata........................................................................................................159

Towards a shared method to classify contaminated territories in the
case of an accidental nuclear event: the PRIME project
C. Mercat-Rommens, S. Chakhar, C. Barde, S. Roussel-Debet
& V. Mousseau..................................................................................................169

Development of a radioecological risk assessment tool for the
Toulon marine area
C. Duffa, H. Thebault, S. Coudray, S. Charmasson & M. Arnaud...............177
Vulnerability index for risk evaluation: an approach for safety on dams in downstream valleys
T. Viseu & A. B. de Almeida

Risk management in the aeronautical industry: results of an application of two methods
H. Fukayama, E. Fernandes & N. F. F. Ebecken

Risk typology
S. Zahedi

Ranking risky alternatives: innovations in subjective utility analysis
J. W. Richardson & J. L. Outlaw

Analysis of the Y2K problem from the viewpoint of risk communication
M. Taniyama & R. Sasaki

Development and applications of a multiple risk communicator

Using statistical analysis to mitigate risk in environmental programs
K. Tiedemann

The implementation of a new ISO 22000 in the Cyprus olive oil industry
A. A. Zorpas & N. Tzia

Section 3: Vulnerability

Vulnerability, sensibility or coastal indicators? A preliminary analysis for a methodology of risk analysis
F. Taveira-Pinto

Vulnerability to torrent processes
S. Fuchs

Analysis of energy supply disturbances in Lithuania
J. Augutis, V. Matuziene, R. Krikstolaitis & E. Uspuras

Trade openness and policy tools: a vulnerability approach for the Italian regions
A. Federici
Section 4: Geomorphologic risk

Slope stability modelling of a sandstone cliff south of Livorno (Tuscany, Italy)
D. Marchetti, G. D’Amato Avanzi, N. Sciarra & M. Calista ..........................321

Influence of spatial variability on 3D slope failures
M. A. Hicks, J. Chen & W. A. Spencer ..........................................................335

An efficient global methodology for hazard analysis of dam complexes and cascades
B. J. Dewals, P. Archambeau, S. Erpicum & M. Pirotton ..........................343

Section 5: Network systems

Modelling of the node immunity change process in a network system
I. Žutautaitė-Seputienė, J. Augutis & E. Ušpuras ........................................357

A high-speed algorithm for repairable stochastic flow networks with converging flows from multiple sources
M. T. Todinov ....................................................................................................367

Section 6: Climate change risks

Climate change and disaster management: reducing risk, saving lives
K. Duncan ........................................................................................................379

Vulnerability assessment survey of oil and gas facilities to climate-driven sea level rises and storm surges on the west coast of Trinidad
B. Singh, A. El Fouladi & K. Ramnath ..........................................................389

Section 7: Hazard prevention, management and control

Benefits of local structural protection to mitigate torrent-related hazards
M. Holub & S. Fuchs ........................................................................................401

Numerical simulation of leaking hydrogen dispersion behavior in a partially open space
K. Matsuura, H. Kanayama, H. Tsukikawa & M. Inoue ..............................413
