The International Journal of

# TRANSPORT DEVELOPMENT AND INTEGRATION

The International Journal on Transport Development and Integration covers all transportation modes and the general topic of transport systems, with particular emphasis on their integration and harmonisation.

The Journal addresses the areas of urban and road transportation, maritime and fluvial transport, rail and aviation, and topics related to logistics, optimisation and complex systems, amongst others. The growing need for integration is partly to respond to the many advances that are taking place in transportation and in order to achieve better uses of all systems, with the subsequent gains in energy efficiency. There is also the need for integration of transportation with telecommunications systems and IT in order to improve safety, security and efficiency.

## International Journal of Computational Methods and Experimental Measurements

The International Journal of Computational Methods and Experimental Measurements provides the scientific community with a forum to present the interaction between the complementary aspects of computational methods and experimental measurements, and to stress the importance of their harmonious development and integration.

The steady progress in the efficiency of computers and software has resulted in the continuous development of computer simulation, which has influenced all scientific and engineering activities. As these simulations expand and improve, the need to validate them grows, and this can only be successfully achieved by performing dedicated experimental tests. Furthermore, because of their continual development, experimental techniques are becoming so complex and sophisticated that they need to be controlled by computers, with the data obtained processed by means of computational methods.

# International Journal of ENVIRONMENTAL IMPACTS

The International Journal of Environmental Impacts provides an international forum to discuss the numerous environmental problems present in modern society and their impacts, taking into account scientific, economic and social issues. One important consideration is the way in which they affect the search for sustainability.

The Journal encourages interdisciplinary communication on all issues related to environmental impacts. There is a need to bridge the gap between the broad spectrum of economic and socio-political disciplines and specialists in engineering and physical, biological, environmental and health sciences, amongst others.

# International Journal of ENERGY PRODUCTION AND MANAGEMENT

Modern societies require an ever increasing amount of energy resources, adding strain to the world economy and creating technological, as well as socio-political, challenges.

The International Journal of Energy Production and Management aims to address the issues raised above and thus act as an interdisciplinary forum for researchers and practitioners from around the globe working on a wide variety of topics related to the future of energy production and management in a changing world.

The Journal covers all aspects of energy research, development and recovery from both primary and renewable sources; power generation, storage and distribution; planning and management. It deals with the comparison of conventional energy sources, particularly hydrocarbons, with a number of alternative ways of producing energy, based on renewable resources such as solar, hydro, wind and geothermal, and by applying new technologies.

# THE KNOWLEDGE CENTRE OF THE WESSEX INSTITUTE OF TECHNOLOGY

THE ESSENTIAL GATEWAY TO THE LATEST SCIENTIFIC RESEARCH

## WIT Press

[www.witpress.com](http://www.witpress.com)

Written by leading specialists, WIT Press books enable researchers, engineers and managers in industry and academia to remain up-to-date with the latest developments in their fields.

Visit our website to view our latest releases, special offers and reviews.

## Submitting your paper

[www.witpress.com/journals](http://www.witpress.com/journals)

WIT Press Journal papers are subjected to peer review. In order to be acceptable for publication submissions must make a new contribution to the scientific community.

Authors interested in submitting a paper are requested to visit our journals website at the following link:

[www.witpress.com/authors](http://www.witpress.com/authors)

or

Contact the editors using the details below:

### WIT Press Journals

WIT Press

Ashurst Lodge

Southampton

Email: [journals@witpress.com](mailto:journals@witpress.com)

## WIT Press eLibrary

Including the Transactions of the  
Wessex Institute

[www.witpress.com/elibrary](http://www.witpress.com/elibrary)

The eLibrary contains over 30,000 open access papers from selected WIT Press titles and the Transactions of the Wessex Institute of Technology. This collection is the most efficient way for researchers and academics to quickly and cost effectively access papers delivered at the Institute's prestigious conferences.

## International Conference Programme

[www.wessex.ac.uk/conferences](http://www.wessex.ac.uk/conferences)

The excellent reputation of WIT Conferences held in different parts of the world serves as an ideal medium to achieve WIT's international knowledge transfer objectives. WIT is also committed to acting as a link between professional and academic bodies and encouraging trans- or inter-disciplinary research.
