University of Lethbridge, Canada
Contents

Part I Concepts and Background 1

Chapter 1 Sustainable irrigation: Setting the scene 3
1 Introduction 3
2 Sustainable irrigation in the context of this book 5
3 An outline of the book 7

Chapter 2 Sustainable irrigation: A historical perspective 13
1 Introduction 13
2 Examples of early irrigation systems/societies 14
   2.1 Mesopotamia 15
   2.2 Egypt—The Nile 16
   2.3 The qanat system 17
   2.4 Bali—Rice growing 18
   2.5 India—A diversity of systems 20
3 Conclusions 22

Chapter 3 Sustainable water projects: The task of economic instruments and supporting institutions 25
1 Introduction 25
2 Institutional setting 26
3 Financial failures in public irrigation 28
4 Economic instruments 30
5 Institutions to improve cost recovery 32
6 Supporting institutions 36
7 Conclusion 38

Chapter 4 Governance and the challenges of water and food security 41
1 Introduction 41
2 Water security and irrigation 43
3 Governance and water security 44
4 Case study: Irrigation, water security, and governance in the Murray–Darling Basin 48
5 Discussion and conclusions 52
Chapter 5  A robust framework for the allocation of water in an ever-changing world

1 Introduction 59
2 Outcomes, principles and concepts 61
3 Defining a robust allocation regime for a regulated river system 62
4 System bulk allocations 64
5 Individual interests 65
6 Water accounting 66
7 Interception 66
8 Allocation management 67
9 Facilitating adjustment in an ever-changing world 67
10 Managing environmental water 70
11 Concluding comment 71

Part II  Case Studies

Chapter 6  Non-profit-maximising values and attitudes influencing irrigators’ management response to new policy instruments

1 Introduction 75
2 Policy problem 76
3 The study region—The Namoi Valley of New South Wales 77
4 Methods 78
5 Findings 79
6 Strengths and limitations 83
7 Policy implications 84
8 Recommendations for future research 86
9 Conclusion 87

Chapter 7  Towards more sustainable irrigation: Factors influencing allocation and entitlement prices and demand in the Goulburn Murray Irrigation District of Australia

1 Introduction 91
2 The study region and water trading background 92
3 Influences on allocation and entitlement prices 97
4 Influences on the elasticity of water demand and supply 98
  4.1 Water allocations 98
  4.2 Water entitlements 100
5 Conclusion 103

Chapter 8  Incorporating the environment into the market: The case of water trusts and environmental water transfers in the western United States

1 Introduction 107
2 Institutional framework for environmental water transfers 109
2.1 Prior appropriations doctrine and beneficial use 109
2.2 Endangered Species Act 110
3 The environmental water market for in-stream flows 111
   3.1 Federal and state provision of in-stream flows 112
      3.1.1 Idaho 112
      3.1.2 Utah 112
      3.1.3 Wyoming 113
      3.1.4 Colorado 114
      3.1.5 Southwestern states 114
      3.1.6 California 114
      3.1.7 Nevada 115
   3.2 Water trusts 115
      3.2.1 Oregon Water Trust 116
      3.2.2 Washington Water Trust 117
      3.2.3 Montana Water Trust 119
      3.2.4 Columbia Basin Water Transactions Program 119
4 Conclusion 119

Chapter 9 Water options contracts to facilitate intersectoral trade 123
1 Introduction 123
2 Potential for intersectoral trade in the Murrumbidgee Valley 124
3 The nature of options contracts and their applicability to water markets 125
   3.1 Valuing water options contracts 127
   3.2 Previous efforts at exploring water options in Australia 127
4 Methodology, data and results 129
   4.1 Estimation of the PVOB from holding a water option 129
      4.1.1 Data 129
      4.1.2 PVOB from holding water option contract 130
   4.2 Estimation of premium payable to writer of option contract 131
      4.2.1 Data 131
4.3 Results 133
5 Policy implications 133
6 Conclusions 134

Chapter 10 Assessing alternative models for farmers’ ability to pay for irrigation water 137
1 Introduction 137
2 Background and conceptual framework 138
   2.1 Policy background 138
   2.2 General economic framework 139
   2.3 General definition of ATP 140
   2.4 Conceptual model of ATP 140
Chapter 14  Sustainability of groundwater resources in India: Challenges and scope for economic instruments and policy

1 Introduction 203
2 Overview of groundwater issues in India 204
3 Linkages between land, energy and water usage 206
   3.1 The economics of water usage and the role of land 207
   3.2 The energy dimension of groundwater usage 209
4 Alternative economic instruments for Indian groundwater 209
   4.1 Demand-side management through quotas 209
   4.2 Market-based instruments for demand allocation 211
   4.3 Payment for environmental services 212
5 Synthesis and conclusions 215
