## Contents

Part I Concepts and Background	1
Chapter 1 Sustainable irrigation: Setting the sco	ene 3
1 Introduction	3
2 Sustainable irrigation in the context of this boo	
3 An outline of the book	7
Chapter 2 Sustainable irrigation: A historical p	erspective 13
1 Introduction	13
2 Examples of early irrigation systems/societies	14
2.1 Mesopotamia	15
2.2 Egypt—The Nile	16
2.3 The qanat system	17
2.4 Bali—Rice growing	18
2.5 India—A diversity of systems	20
3 Conclusions	22
Chapter 3 Sustainable water projects: The task	of economic
instruments and supporting institution	ons 25
1 Introduction	25
2 Institutional setting	26
3 Financial failures in public irrigation	28
4 Economic instruments	30
5 Institutions to improve cost recovery	32
6 Supporting institutions	36
7 Conclusion	38
Chapter 4 Governance and the challenges of wat	ter
and food security	41
1 Introduction	41
2 Water security and irrigation	43
3 Governance and water security	44
4 Case study: Irrigation, water security, and gove	ernance
in the Murray–Darling Basin	48
5 Discussion and conclusions	52

Chap	oter 5 A robust framework for the allocation of water in an ever-changing world	59
1	Introduction	59
	Outcomes, principles and concepts	61
	Defining a robust allocation regime for a regulated river system	62
4	System bulk allocations	64
	Individual interests	65
	Water accounting	66
	Interception	66
	Allocation management	67
	Facilitating adjustment in an ever-changing world	67
	Managing environmental water Concluding comment	70 71
	-	
Part	II Case Studies	73
Chap	oter 6 Non-profit-maximising values and attitudes influencing	
	irrigators' management response to new policy instruments	75
1	Introduction	75
2	Policy problem	76
3	The study region—The Namoi Valley of New South Wales	77
4	Methods	78
	Findings	79
	Strengths and limitations	83
	Policy implications	84
	Recommendations for future research	86
9	Conclusion	87
Chap	oter 7 Towards more sustainable irrigation: Factors influencing allocation and entitlement prices and demand in the Goulburn Murray Irrigation District of Australia	91
	<b>T</b> . <b>1</b>	0.1
-	Introduction	91
	The study region and water trading background Influences on allocation and entitlement prices	92 97
	Influences on the elasticity of water demand and supply	- 97 - 98
т	4.1 Water allocations	- 98
	4.2 Water entitlements	100
5	Conclusion	103
Chap	oter 8 Incorporating the environment into the market: The case of water trusts and environmental water transfers in the western United States	107
1	Introduction	107
	Institutional framework for environmental water transfers	109

2.1 Prior appropriations doctrine and beneficial use	109
2.2 Endangered Species Act	110
3 The environmental water market for in-stream flows	111
3.1 Federal and state provision of in-stream flows	112
3.1.1 Idaho	112
3.1.2 Utah	112
3.1.3 Wyoming	113
3.1.4 Colorado	114
3.1.5 Southwestern states	114
3.1.6 California	114
3.1.7 Nevada	115
3.2 Water trusts	115
3.2.1 Oregon Water Trust	116
3.2.2 Washington Water Trust	117
3.2.3 Montana Water Trust	119
3.2.4 Columbia Basin Water Transactions Program	119
4 Conclusion	119
Chapter 9 Water options contracts to facilitate intersectoral trade	123
1 Introduction	123
2 Potential for intersectoral trade in the Murrumbidgee Valley	124
3 The nature of options contracts and their applicability to water	
markets	125
3.1 Valuing water options contracts	127
3.2 Previous efforts at exploring water options in Australia	127
4 Methodology, data and results	129
4.1 Estimation of the PVOB from holding a water option	129
4.1.1 Data	129
4.1.2 PVOB from holding water option contract	130
4.2 Estimation of premium payable to writer of option contract	131
4.2.1 Data	131
4.3 Results	133
5 Policy implications	133
6 Conclusions	134
Chapter 10 Assessing alternative models for farmers' ability to pay	
for irrigation water	137
1 Introduction	137
2 Background and conceptual framework	138
2.1 Policy background	138
2.2 General economic framework	139
2.3 General definition of ATP	140
2.4 Conceptual model of ATP	140

2.4	.1 Basic model	140
	.2 Alternative ATP models	142
	ne additional issues	144
2.6 Fu	ther remarks	145
2.7 Pre	vious literature	145
3 Case stu	idy from the Kyrgyz Republic	146
	kground: Description of study area	146
	ne preliminaries in the application of alternative models	147
	plication of alternative models	147
4 Conclus	ions	150
Chapter 11	Energy prices, biofuels, and irrigated agriculture	153
1 Introdu	ction	153
2 Model of	of irrigation water demand	154
2.1 Op	timal water use and output levels	155
3 Impact	of changing energy prices	156
3.1 Im	pacts of energy prices on optimal water prices	158
4 Choice	of irrigation and conveyance technology	160
4.1 Im	pacts of technology adoption on water use and output	162
-	of changing energy prices on technology choice	167
6 Conclus	ion	169
Chapter 12	Toward sustainable irrigation: Would subsidizing	
Chapter 12	improve technologies result in water conservation	
Chapter 12		173
Chapter 12	improve technologies result in water conservation in Alberta, Canada?	<b>173</b> 173

3.1 Charges for water resource development and use	191
3.2 Costing of water use	192
4 Hydrological issues	193
4.1 Metering and complete description of water use entitlements	193
4.2 Water quality impacts	193
5 Empirical results of water marketing studies	194
5.1 Efficiency of water use	194
5.2 Risk in water marketing	195
6 Equity with water allocation	196
7 Governance in water management	197
8 Separation of water and land rents	199
9 Conclusion	199

#### Chapter 14 Sustainability of groundwater resources in India: Challenges and scope for economic instruments and policy

203

1	Introduction	203
2	Overview of groundwater issues in India	204
3	Linkages between land, energy and water usage	206
	3.1 The economics of water usage and the role of land	207
	3.2 The energy dimension of groundwater usage	209
4	Alternative economic instruments for Indian groundwater	209
	4.1 Demand-side management through quotas	209
	4.2 Market-based instruments for demand allocation	211
	4.3 Payment for environmental services	212
5	Synthesis and conclusions	215
